Marine Stereo

210 watt, dual speakers, AM/FM/CD Satellite Ready

The Grill N Chill® is the Ultimate Tailgating Experience®. Designed for Avid Consumers, Event Marketers, and Campaign Professionals, our line of award winning products represents the world's finest tailgating equipment.

At the heart of the Grill N Chill you will find our Infrared Grills. World class in every detail, boasting flawless design and mirrored Stainless Steel finishes, these grills use the same technology found in the world's finest steak houses.

The soul of the Grill N Chill line is its Marine stereo. The 210 watt sound systems feature dual marine grade speakers, CD players and are satellite radio ready.

The Grill N Chill suite has Ice Chests to carry both hot and cold food stores. The professional grade Stainless Steel 50 quart Ice Chests feature integrated drain systems and dual Butcher Block Lids that double as prep surfaces.

When bundled with the powerful GO! Chassi®, the Grill N Chill is carried into service by a vehicle's standard two inch receiver hitch.

The powerful GO! Chassi® and its patented Hitch and GO!™ design enable individuals to lift and transport 500 lb. payloads between job sites.

Payloads are easily attached to a vehicle using the hand cranked scissor lift. When attached, the entire payload weight is transferred to the hitch, safely suspending the GO! Chassi and its payload above the road surface.

Each unit comes with a Chassi® Hitch™ designed to attach to 2" x 2" vehicle receivers. The Chassi Hitch has adjustable settings and works with Vehicle Receivers 12" to 35" above the road surface.

The GO! Chassi reduces work-related lifting injuries, enables one-man operations, frees up vehicle storage (cab and truck bed) and allows cargo to be rolled and secured when not in use.

The rugged Go! Chassi provides a compact portable and cost effective way of rolling applications into service, bringing equipment exactly where it needs to be.
